CONTENTS OF VOLUME 112

NUMBER 1, 8 JANUARY 1987

REN, L. X. and KOU, S. Q., Slightly slanting impact on an elastic cantilever column—an experimental study	1
TSUNEKAWA, S., KAJIKAWA, Y., NOHARA, S., ARIIZUMI, M. and OKADA, A., Study on the perceptible level for infrasound	15
MIRONOWICZ, W. and ŚNIADY, P., Dynamics of machine foundations with random parameters	23
MURATA, A., KUME, Y. and HASHIMOTO, F., Application of catastrophe theory to forced vibration of a diaphragm air spring	31
KELTIE, R. F. and PENG, H., Acoustic power radiated from point-forced thin elastic plates	45
NATH, Y., MAHREHOLTZ, O. and VARMA, K. K., Non-linear dynamic response of a doubly curved shallow shell on an elastic foundation	53
SPRYSL, H., Internal resonance of non-linear autonomous vibrating systems with two degrees of freedom	63
NEWLAND, D. E., On the modal analysis of non-conservative linear systems	69
ADAMS, M. L., Insights into linearized rotor dynamics, Part 2	97
LUNDQVIST, L. and BOSTRÖM, A., Acoustic waves in a cylindrical duct with infinite, half-infinite, or finite wall corrugations	111
CHASE, D. M., The character of the turbulent wall pressure spectrum at subconvective wavenumbers and a suggested comprehensive model	125
PATEL, M. H. and JESUDASEN, A. S., Theory and model tests for the dynamic response of free hanging risers	149

Letters to the Editor

PIERRE, C., Eigensolution perturbation for systems with perturbed boundary conditions	167
GORMAN, D. J., A modified superposition method for the free vibration analysis of right triangular plates	173
BAPAT, C. N. and BAPAT, C., Natural frequencies of a beam with non-classical boundary conditions and concentrated masses	177
MICKENS, R. E., OYEDEJI, K. and SPEIGHT, K. R., A computational method for the determination of the response of a linear system	183
REDMAN-WHITE, W., NELSON, P. A. and CURTIS, A. R. D., Experiments on the active control of flexural wave power flow	187
BROOKS, T. F., MARCOLINI, M. A. and POPE, D. S., A directional array approach for the measurement of rotor noise source distributions with controlled spatial resolution	192
SLOANE, C., Proportionality of beat rate and tempering of musical intervals	198

NUMBER 2, 22 JANUARY 1987

HROVAT, D. and HUBBARD, M., A comparison between jerk optimal and acceleration optimal vibration isolation	201
--	-----

DOKUMACI, E., A study of finite element spaces of uniform bars in free axial or torsional vibration from the viewpoint of bracketing of eigenvalues by ultimate and initial enforcement of bounds	211
OLBERDING, D. J. and SINHA, S. C., Response of non-linear non-stationary systems subjected to pulse excitation	227
SINHA, S. C. and JAGANNATHAN, M., Pulse response of non-linear non-stationary vibrational systems with N degrees of freedom	237
OTHMAN, A. M., WATT, D. and BARR, A. D. S., Stability boundaries of an oscillator under high frequency multicomponent parametric excitation	249
IH, J.-G. and LEE, B.-H., Theoretical prediction of the transmission loss of circular reversing chamber mufflers	261
LEUNG, A. Y. T., A simple method for exponentially modulated random excitation	273
HASOFER, A. M., Distribution of the maximum of a Gaussian process by a Monte Carlo method	283
TABARROK, B., FENTON, R. G. and ELSAIE, A. M., Lateral vibration of square plates subject to in-plane loadings	295
WARD, A., TOWERS, M. S. and BARKER, H. A., Dynamic analysis of helical springs by the assumed mode method	305
SUN, J. C., LALOR, N. and RICHARDS, E. J., Power flow and energy balance of non-conservatively coupled structures, I: Theory	321
SUN, J. C., CHOW, L. C., LALOR, N. and RICHARDS, E. J., Power flow and energy balance of non-conservatively coupled structures, II: Experimental verification of theory	331
KOTAKE, S. and TAKAMOTO, K., Combustion noise: effects of the shape and size of burner nozzle	345
LEUNG, R. C. N. and PINNINGTON, R. J., Responses of an elastic disc to in-plane forces	355
GJESTLAND, T., Assessment of annoyance from road traffic noise	369

Letters to the Editor

KIM, C. S., and DICKINSON, S. M., Comment on "Transverse vibrations of a rotating uniform cantilever beam with tip mass as predicted by using beam characteristic orthogonal polynomials in the Rayleigh-Ritz method"	377
BHAT, R. B., Author's reply	378
CORTINEZ, V. H., LAURA, P. A. A., FILIPICH, C. P. and CARNICER, R., In-plane vibrations of a clamped column-arch system carrying a concentrated mass at the free end	379
ÅBOM, M., An analytical model for reactive silencers based on Bragg-scattering	384
FULLER, C. R. and JONES, J. D., Experiments on reduction of propeller induced interior noise by active control of cylinder vibration	389
ABRAHAM, I. D., Scattering of sound by three semi-infinite planes	396
DOKUMACI, E., An expression for the approximate natural frequencies which the basic Bernoulli-Euler element gives when the number of elements is large	399

MAJEWSKI, T., Synchronous vibration eliminator for an object having one degree of freedom	401
BAKR, E. M. and SHABANA, A. A., Effect of geometric elastic non-linearities on the impact response of flexible multi-body systems	415
RAMAKRISHNAN, J. V. and KOVAL, L. R., A finite element model for sound transmission through laminated composite plates	433
ERCOLI, L. and LAURA, P. A. A., Analytical and experimental investigation on vibrating, continuous rectangular plates of non-uniform thickness	447
WANG, J. T.-S., SHAW, D. and MAHREHOLTZ, O., Vibration of rotating rectangular plates	455
GIBBS, B. M. and SHEN, Y., The predicted and measured bending vibration of an L-combination of rectangular thin plates	469
LAKSHMANA GOWDA, B. H. and PRABHU, D. R., Interference effects on the flow-induced vibrations of a circular cylinder	487
CHEN, G., A generalized Galerkin's method for non-linear oscillators	503
HASHIMOTO, K., The eigenvalue problem for $-\Delta u = \lambda u$ with Dirichlet boundary conditions for a certain class of two-dimensional regions	513
HUTTON, S. G., CHONAN, S. and LEHMANN, B. F., Dynamic response of a guided circular saw	527

Letters to the Editor

DIMAROGONAS, A., Modeling damaged structural members for vibration analysis	541
YUEN, M. M. F., Author's reply	544
LY, B. L., An upper and a lower bound for natural frequencies	547
VOMBATKERE, S. G., RADHAKRISHNAN, R. and RAMAMURTI, V., Lowest bending and torsional frequencies of a prismatic guyed mast carrying a mass at its top	550
BHAT, R. B., Beam characteristic orthogonal polynomials with fractional power increments	556
SUBRAHMANYAM, K. B., Non-linear extensional vibrations of rotating bars treated by the Galerkin and finite-difference methods	559
GUTIERREZ, R. H. and LAURA, P. A. A., Transverse vibrations of a rectangular plate elastically restrained along the edges with a rigid mass on the inside edge	564
BALLAGH, K. O., Acoustical admittance of cylindrical cavities	567
MULCAHY, T. M., Avoidance of the lock-in phenomenon in partial crossflow	570
FINNVEDEN, S., The boundary condition for a free surface with gravity waves formulated as a locally reacting surface impedance	575
ERRATA	577
